Prices are valid from January 1, 2005 until further notice.

- A PL/SQL Developer license is a download license by default. The customer will receive an e-mail with a license key and download instructions. If you include part 9234, we will additionally ship a boxed product with printed documentation and installation CD. Shipment is performed by FedEx International Priority from The Netherlands. Delivery time is 2-4 business days, depending on the destination country. A shipment tracking number will be included with the order confirmation.
- A PL/SQL Developer license does not implicitly include a Service Contract. This is a separate option (part 5266.xx) that can be included with a license, and entitles the customer to receive updates and technical support for the period of 1 year. After this year the customer can purchase a new service contract for renewal.  
Without a service contract the customer is entitled to patch releases (7.0.x).
- License upgrades are available for the price difference between the license packs. For example, an upgrade from a 5 user license to a 10 user license costs USD 270.00 (675.00 – 405.00). The part number suffix is the old and new number of licenses. For a 5 to 10 user upgrade: 8994.5.10. The same applies to the Annual Service Contract.
